

Self-supporting moulded parts, embossed and stamped parts made of polyurethane soft foam or non-woven fabrics are used as INDUMONT interior parts in vehicle manufacture. A large selection of base and decoration materials is the basis for a wide range of applications. Customised product developments for small and medium-sized series meet technical requirements and individual design requirements.

✓ PRODUCTS USED

INDUMONT moulded parts

- self-supporting moulded parts made of various non-woven fabrics

INDUMONT embossed parts

- embossed parts made of surface-finished PUR soft foam

INDUMONT stamped parts

- stamped parts and cut to size parts made of non-woven fabrics and PUR soft foam

✓ AREAS OF APPLICATIONS

Interior lining systems for

- construction and agriculture machinery
- motor vehicles
- motor caravans
- special vehicles

✓ IMPORTANT PRODUCT CHARACTERISTICS

- acoustically effective
- simple assembly
- high dimensional stability

✓ FURTHER BENEFITS

- wide variety of base and decorative materials
- wide variety of production processes
- individual product development
- expert, committed project support

✓ EXISTING APPLICATIONS

- roof liners
- pillar, side and door panels
- consoles, parcel shelves
- functional and design elements
