

Surface-compressed polyurethane-polyether foam materials are used as coating foams for leather interior parts. Our production process smoothes the foam surface. The adhesive coating prevents formation of typical orange peel effect and gives the finished component a high quality surface quality.

## ✓ PRODUCTS USED

### **INDUCON® compressed foam**

- ether-based mixed cell:  
INDUCON® T30, T65, T95  
INDUCON® T-LO

## ✓ IMPORTANT PRODUCT CHARACTERISTICS

- smooth, fine-pored surface
- narrow thickness tolerances
- good resilience
- good hydrolysis resistance
- controllable hardness
- high elasticity
- low-emission

## ✓ EXISTING APPLICATIONS

- haptics and laminations for interior equipment for leading manufacturers in the automotive industry
