

INDUCON® is used for protection in the production of electronic components with casting resin sheathing. The elastic, temperature-resistant material prevents the cast components being damaged by the casting resin. It protects against excessive temperatures and compensates for the pressure inside the component produced in the shrinking process of the resin.

✓ PRODUCTS USED

INDUCON® compressed foam

- ester-based mixed cell: INDUCON® S150, S230

✓ IMPORTANT PRODUCT CHARACTERISTICS

- high temperature resistance
- high elasticity with medium hardness
- good resilience
- low compression set

✓ EXISTING APPLICATIONS

- instrument transformers
- current transformers
