

Stamped parts and cut to size parts made of PUR soft foam and non-woven fabrics round off the range of self-supporting moulded parts and thermoformed parts in the vehicle interior with functional and design elements.

✓ DESIGN

Basis

- 2D/3D data
- interfaces: IGES, STEP, DXF
- templates
- CAD system: Solid Works, AutoCAD
- component development based on prototypes
- maximum component measurement:
ca. 3.000 x 2.000 mm

Tools

- stamping tools
- programming waterjet

✓ PROPERTIES

- simple assembly
- acoustically effective
- low tool costs
- flammability complies with ISO 3795 and FMVSS 302
