

Bauma 2022: Mayser at the world's largest trade fair

Contemporary design for modern cab interiors

At this year's Bauma trade fair in Munich, Mayser will present state-of-the art, noise-absorbing interior components for drivers cabs.

That makes Mayser once again one of 3,700 exhibitors at the Bauma in Munich, the international gathering of the construction, materials and mining machine industry. On the world's largest exhibition space, at 614,000 m², the specialist equipment producer will present interior components for superior driver comfort in commercial and construction vehicles. The product portfolio includes acoustically effective INDUMONT moulded parts, which reduce noise stress for drivers. Also on show will be the noise-absorbing acoustic foam INDUPHON, which is used for engine room enclosures and other noise-emitting machine assemblies.

INDUMONT vehicle interior systems provide quality, custom cab interiors in a large range of fabrics, colours and designs with attractive haptics and optics. The moulded parts are made from mixed-fibre nonwoven textiles in a blend of natural and artificial fibres. They are self-supporting, lightweight and shape-stable. This offers cab and vehicle manufacturers custom interior concepts ideally suited to their needs. The easy assembly for manufacturers and the long service life of the moulded parts add up to low life cycle costs and underline the sustainability of products from Mayser.

About Mayser

Mayser GmbH & Co. KG is an international group of companies that develops, produces and markets high quality products and solutions in the areas of Safety Technology, Foam Technology and Moulding. Mayser products are used primarily in the automotive industry, mechanical engineering, and in public transport. The portfolio also includes fashionable headwear, which the company has been manufacturing since it was founded in the year 1800. Worldwide, Mayser has about 750 employees at the headquarters in Lindenberg and the neighbouring location in Ulm (both in Germany), as well as Slovakia and the USA. Turnover in the Mayser Group for the year 2021 totalled about 69 million euros.
