

INDUSKIN combines function and aesthetics to make unique products! INDUSKIN is therefore used as a gliding material and carrier of active agents for wet shavers. On the one hand, the material tightens the skin, so that the facial hair stands upright in front of the razor blade, and on the other hand INDUSKIN discharges skin care substances and contributes to a perfect wet shave.

✓ PRODUCTS USED

INDUSKIN soaked

- colour pigments: silver-metallic, cool-grey, violet, neon-yellow, apple green, etc.
